

Why choose a covering system from Agridek?

- Agridek comes from a **farming background** and stands alongside you as a livestock farmer and entrepreneur.
- You have a dedicated contact person with **extensive knowledge**.
- Agridek is reliable and **100% specialized** in covering systems.
- In everything we do, we focus on **maximizing value**.
Value for your business, value of technology, value for your organization and job satisfaction, and value for the environment.
- Agridek is the **inventor of the lasagna clamp** and brings **innovations** that matter.
- **Collaboration** in the way that suits you best.
- The covering system that suits **your situation and needs**.
- Proven quality at **a fair price**.

Agridek Summed up the best choice

Agridek also strong in:

- forage advice ▪ cover sheets ▪ portal systems ▪ duo-portal systems
- rail system ▪ reel systems ▪ cover tubes ▪ cutting edge curtains

Rail system

fixed roll

A covering system that suits you! With the rail system, you can very easily and quickly cover an entire (lasagna) clamp within 25 minutes. The big advantage of the Agridek Rail System with a fixed roll is that it runs **on the wall** and is therefore applicable to trench silos with an earth wall. With many adjustment options and custom production, this machine fits seamlessly on your existing or new trench silo. In addition to this version with a fixed roll, Agridek also offers a rail system with interchangeable rolls.

Rail system with a fixed roll

Why choose a rail system with a fixed roll:

The rail system with a fixed roll consists of a self-propelled frame with a driven roll, to which the permanent cover sheet with integrated cover tubes is attached. The machine **is height adjustable** and runs **on the silo wall**. Because the roll cannot be swapped, this system is ideal for one trench silo (existing or new).

The rail system is fully electric and operates on 400V power. The system is characterized by **speed, robustness, and many adjustment options**. With a **wireless remote control**, you can easily operate the independent drive motors and the roll from a distance.

Easy to operate with the wireless remote control.

Maximize value from forage

Specifications Rail System FIXED ROLL

- Suitable for trench silos up to 12 meters wide, 4.0 meters high, and 80 meters long.
 - Also for existing or new trench silos with an earth wall.
 - Fully on 400V power and therefore very quiet.
 - Standard with wireless remote control.
 - Height adjustable with pin connection.
 - Lifting capacity above 2.5 tons with a full roll.
 - Front-wheel drive, so the system can never tip over.
 - Sufficient power to allow "Rolling with water."
 - Main frame adjustable in width to compensate for deviations in silo dimensions.
 - Power supply cable standard with pull protection.
 - Sliding cams on the wall to sweep away dirt.
 - Fully custom produced.
 - Long lifespan due to galvanized frame.
 - Signal lights and beeper with adjustable sound level.
-
- **Many extra options available such as:**
 - Extra heavy main frame for silos between 12 and 14 meters wide.
 - LED lights via remote control.
 - Customized wheel widths and guide discs for irregular walls.
 - Hydraulic height adjustment up to 2.25 meters to allow passage under the machine.
 - Cutting edge curtain.
